OF THE

COLLEGE OF MEDICINE

ANNOUNCEMENT

1921-22

Published by the University

April 28, 1921

LINCOLN, NEBRASKA

The Bulletin of the University of Nebraska is published monthly in November, semi-monthly in May, tri-monthly in February, weekly in March and semi-weekly in April of each year by the University of Nebraska. Entered at the Post-Office at Lincoln, Nebraska, as second-class matter under Act of Congress July 16, 1894.

Acceptance for mailing at special rate postage provided for in Section 1103, Act of October 3, 1917, authorized July 18, 1918.

Sept. 14-17—Registration, first semester.
 Nov. 24—Thanksgiving holiday.
 Dec. 22-Jan. 3—Christmas recess.

1922

Jan. 18-21—Registration, second semester.
 Mar. 25-Apr. 1—Spring recess.
 June 5—Fifty-first Annual Commencement.

CALENDAR FOR 1921-22 OF ALL COLLEGES AND SCHOOLS

1921

September 12-17	Monday-Saturday	Entrance examinations
September 14-17	Wednesday-Saturday	Registration, first semester
September 17	Saturday, 8 p. m.	University reception to all students
September 19	Monday	First semester classes meet
September 20	Tuesday, 11 a. m.	Opening address by the Chancellor
October 10	Monday	School of Agriculture, first semester begins
November 24	Thursday	Thanksgiving holiday
December 13	Tuesday	Meeting of the Board of Regents
December 22	Thursday, 6 p. m.	Christmas recess begins

1922

January 3	Tuesday, 8 a. m.	Christmas recess ends
January 5	Thursday	Meeting of the Board of Regents
January 16	Monday	School of Agriculture, second semester begins
January 14-21	Saturday-Saturday	First semester examinations
January 16-21	Monday-Saturday	Entrance examinations
January 18-21	Wednesday-Saturday	Registration, second semester
January 23	Monday	Second semester classes begin
February 14	Tuesday	Annual address before Phi Beta Kappa and Sigma Xi societies
February 15	Wednesday	Meeting of the Board of Regents
March 25	Saturday, 6 p. m.	Spring recess begins
April 1	Saturday, 6 p. m.	Spring recess ends
April 11	Tuesday	Meeting of the Board of Regents
April 14	Friday	School of Agriculture Commencement
May 27-June 3	Saturday-Saturday	Second semester examinations
June 1	Thursday	Teachers College High School Commencement

Commencement Week

June 3	Saturday	Final recommendations for degrees
		Annual meeting of the Board of Regents
June 3	Saturday	Class Day. Alumni Day
June 4	Sunday	Baccalaureate Sermon
June 5	Monday	Fifty-first Annual Commencement

Summer Session 1922

June 3	Saturday	Registration, Summer Session
June 5	Monday	Summer Session begins

1922-1923

September 13	Wednesday	First semester begins

THE BOARD OF REGENTS

Members 1921	Term Expires
HON. PHILIP LOUIS HALL, Lincoln, President.....	1923
HON. HARRY DeWITT LANDIS, Seward.....	1923
HON. FRANK WOODHULL JUDSON, Omaha.....	1925
HON. JOHN ROBINSON WEBSTER, Omaha.....	1925
HON. GEORGE N. SEYMOUR, Elgin.....	1927
HON. WILLIAM LaVERNE BATES, Kimball.....	1927

James Stuart Dales, Secretary.

COMMITTEES OF THE BOARD OF REGENTS

Executive—Messrs. Hall, Bates, Judson.
 Finance—Messrs. Seymour, Webster, Landis.
 Property—Messrs. Webster, Seymour, Hall.
 Industrial Education—Messrs. Landis, Bates, Judson.
 Medical Education—Messrs. Judson, Hall, Landis.
 Organization—Messrs. Bates, Seymour, Webster.

OFFICERS OF ADMINISTRATION AND INSTRUCTION

The University

Samuel Avery, Ph.D., LL.D., Chancellor of the University.
 Administration Hall. City Campus.
 James Thomas Lees, Ph.D., Provost of the University. Administration Hall. City Campus.
 Florence Irwin McGahey, A.B., Registrar and University Publisher.
 (*Secretary of the Faculties.*) Administration Hall. City Campus.

The College

Irving Samuel Cutter, Dean

John Franklin Allen, M.D., Clinical Assistant in Medicine.
 William Nance Anderson, B.Sc., M.D., Assistant Professor of Medicine.
 Carl Hardin Ballard, M.D., Assistant Professor of Roentgenology.
 John Monroe Banister, A.B., M.D., Assistant Professor of Tropical and Military Medicine.
 Elmer William Bantin, B.Sc., M. D., Clinical Assistant in Pediatrics.
 Harry Banguess, B.Sc., M.D., Assistant Instructor in Biochemistry.
 Rodney Waldo Bliss, B.Sc., M.D., Assistant Professor of Medicine.
 Edson Lowell Bridges, M.D., Assistant Professor of Medicine.
 Willson Orton Bridges, M.D., Professor Emeritus of Medicine.
 Alfred Jerome Brown, A.B., M.D., Assistant Professor of Surgery.
 William Frederick Callfas, C.M., M.D., Instructor in Clinical Otology.

¹Resigned.

Burton Whitford Christie, B.Sc., M.D., Assistant Professor of Pediatrics.

Frank Matthew Conlin, M.D., Instructor in Medicine.

Leroy Crummer, B.Sc., M.D., Professor of Medicine. (*Chairman of Department.*)

Irving Samuel Cutter, B.Sc., M.D., Professor of Biochemistry. (*Chairman of Department.*)

Byron Bennett Davis, A.B., M.D., Professor of the Principles of Surgery and Clinical Surgery.

Edwin Davis, A.B., M.D., Professor of Urology. (*Chairman of Department.*)

Augustus K. Detwiler, A.B., M.D., Assistant Professor of Medicine.

Harold E. Eggers, B.Sc., M.D., Professor of Pathology and Bacteriology. (*Chairman of Department.*)

Harold Gifford, B.Sc., M.D., Professor of Ophthalmology and Otology. (*Chairman of Department.*)

Sanford R. Gifford, A.B., M.D., Instructor in Ophthalmology.

James Samuel Goetz, M.D., Assistant Professor of Medicine. (*Chairman of Department of Therapeutics.*)

Abe Greenberg, B.Sc., M.D., Clinical Assistant in Surgery.

August Ernest Guenther, Ph.D., Professor of Physiology and Pharmacology. (*Chairman of Department.*)

Lynn Thompson Hall, B.Sc., M.D., Instructor in Medicine.

Howard Brownlee Hamilton, M.D., Assistant Professor of Pediatrics.

Vincent Charles Hascall, LL.B., Instructor in Medical Jurisprudence.

Madalene S. Hillis, Librarian of Medical College Library.

Charles Aaron Hull, M.D., Assistant Professor of Surgery.

John C. Iwerson, M.D., Clinical Assistant in Pediatrics.

Charles Stanton James, M.D., Clinical Assistant in Ophthalmology.

Aldis Adelbert Johnson, Ph.B., M.D., Instructor in Medicine.

August Frederick Jonas, M.D., Professor of Surgery. (*Chairman of Department.*)

John Jay Keegan, A.M., M.D., Assistant Professor of Pathology.

Charles Rex Kennedy, M.D., Professor of Clinical Surgery.

Archibald Roy Knode, M.D., Instructor in Laryngology.

John S. Latta, Ph.D., Assistant Professor of Anatomy.

James Thomas Lees, Ph.D., (Ex-Officio).

Henry Bassett Lemere, M.D., Instructor in Ophthalmology and Otology.

Adolph Bernard Lindquist, A.B., M.D., Instructor in Ophthalmology and Otology.

John Prentiss Lord, M.D., F.A.C.S., Professor of Orthopedic Surgery. (*Chairman of Department.*)

James Eric Lynch, B.Sc., Assistant in Histology.

Harry Monroe McClanahan, A.M., M.D., Professor of Pediatrics.
(*Chairman of Department.*)

Otis Wallace Martin, B.Sc., M.D., Clinical Assistant in Urology.

William Forsyth Milroy, M.D., Professor of Clinical Medicine.

George Mogridge, M.D., Lecturer on Arrested Development of the Mind, Glenwood, Iowa.

John Clyde Moore, Jr., B.Sc., M.D., Assistant Professor of Pediatrics.

Sergius Morgulis, Ph.D., Professor of Biochemistry.

R. Allyn Moser, A.B., M.D., Assistant Instructor in Medicine.

John Tennyson Myers, A.B., M.S., Assistant Professor of Bacteriology.

Frederick W. Niehaus, B.Sc., M.D., Clinical Assistant in Medicine.

John Rudolph Nilsson, M.D., Instructor in Surgery.

Donald R. Owen, B.Sc., M.D., Clinical Assistant in Laryngology and Rhinology.

Frank Styles Owen, M.D., Professor of Laryngology and Rhinology.
(*Chairman of Department.*)

James McDowell Patton, A.M., M.D., Associate Professor of Ophthalmology.

¹Amos W. Peters, A.M., Ph.D., Professor of Biochemistry.

Charles Whitney Pollard, A.B., M.D., Professor of Obstetrics and Gynecology. (*Chairman of Department.*)

George Benjamin Potter, M.D., Clinical Assistant in Laryngology and Rhinology.

John Beekman Potts, M.D., Instructor in Laryngology.

Charles William McCorkle Poynter, B.Sc., M.D., Professor of Anatomy.
(*Chairman of Department.*)

George Pratt, B.Sc., M.D., Instructor in Medicine.

Daniel T. Quigley, M.D., Instructor in Surgical Pathology.

Charles O'Neill Rich, B.Sc., M.D., Assistant Professor of Surgery.

Clyde Augustus Roeder, M.D., Instructor in Surgery.

William Lytle Ross, Jr., B.Sc., M.D., Clinical Assistant in Urology.

Clarence Rubendall, B.Sc., M.D., Clinical Assistant in Laryngology and Rhinology.

Abraham S. Rubnitz, B.Sc., M.D., Clinical Assistant in Pediatrics.

Carl Frederick Rusche, B.Sc., M.D., Assistant Instructor in Physiology.

Earl C. Sage, B.Sc., M.D., Instructor in Obstetrics.

Alfred Schalek, A.M., M.D., Professor of Dermatology and Syphilology.
(*Chairman of Department.*)

Albert Schneider, M.D., Ph.D., Associate Professor of Pharmacology.

Robert D. Schrock, A.B., M.D., Instructor in Orthopedic Surgery.

Andrew Bartholomew Somers, M.D., Professor Emeritus of Obstetrics.

Robert James Stearns, M.D., Clinical Assistant in Urology.

¹Resigned.

Arthur Charles Stokes, B.Sc., M.D., Professor of Clinical and Experimental Surgery.

John Edwards Summers, M.D., Professor of Clinical Surgery.

Willis Harvey Taylor, B.Sc., M.D., Instructor in Obstetrics.

Amos Thomas, LL.B., Instructor in Medical Jurisprudence.

Kenneth Levi Thompson, B.Sc., M.D., Clinical Assistant in Surgery.

Charles Creighton Tomlinson, M.D., Instructor in Dermatology.

Solon Rodney Towne, A.M., M.D., Professor Emeritus of Hygiene.

Chester Hill Waters, B.Sc., M.D., Instructor in Gynecology.

Joseph A. Weinberg, B.Sc., M. D., Assistant Instructor in Pathology.

William Penaluna Wherry, M.D., Instructor in Laryngology and Rhinology.

Harrison Alonzo Wigton, B.Sc., M.D., Instructor in Nervous and Mental Diseases.

William Albert Willard, Ph.D., Professor of Anatomy.

G. Alexander Young, M.D., Professor of Nervous and Mental Diseases.
(*Chairman of Department.*)

COMMITTEES OF THE FACULTY

Advanced Standing and Delinquency—Dr. Poynter (*Chairman*), Dr. Willard, Dr. Keegan.

Clinical Teaching—Dr. Cutter (*Chairman*), Dr. Stokes, Dr. W. O. Bridges.

Course of Study, Catalog and Schedule—Dr. Guenther (*Chairman*), Dr. Eggers, Mr. Myers.

Scholarships and Research Prizes—Dr. Gifford (*Chairman*), Dr. J. E. Summers, Dr. E. L. Bridges.

Student Activities—Dr. Pollard, (*Chairman*), Dr. Christie, Dr. Anderson.

Convocations—Dr. Bliss (*Chairman*), Dr. Patton, Dr. Lord.

Libray—Dr. Crummer (*Chairman*), Dr. Brown, Dr. Guenther, Dr. Potts.

Summer Session—Dr. Willard (*Chairman*), Dr. Anderson, Dr. Kennedy.

Graduate Work—Dr. Eggers (*Chairman*), Dr. Poynter, Dr. Keegan.

Dispensary—Dr. Keegan (*Chairman*), Dr. E. L. Bridges, Dr. Kennedy.

Publications—Dr. Brown (*Chairman*), Dr. Patton, Dr. Rich.

University Hospital—Dr. B. B. Davis (*Chairman*), Dr. Crummer, Dr. H. Gifford, Dr. F. S. Owen, The Dean.

Teaching of Surgery—Dr. Jonas (*Chairman*), Dr. J. E. Summers, Dr. B. B. Davis, Dr. Stokes.

Staff Clinics—Dr. Young (*Chairman*), Dr. Hamilton, Dr. Patton, Dr. Jonas.

COLLEGE OF MEDICINE**General Information**

The University of Nebraska College of Medicine was established in 1903, and since that time it has made rapid advancement. Today it stands among the leading medical colleges of the country in the character of its training of future practicing physicians.

The state legislatures during the past few years have appropriated more than a half million dollars for the erection of laboratory buildings which are now completed and amply provided with up-to-date equipment. The University Hospital, on the Medical campus, strictly for teaching purposes, contains a hundred and thirty beds available for clinical teaching in various services. (See plan of buildings, following page 26.)

Standing

The College of Medicine meets the requirements of the most exacting state examining and licensing boards. Its diploma grants the holder all privileges accorded to graduates of any medical college in the United States. The Royal College of Physicians and Surgeons in England has added the University of Nebraska to the short list of American institutions whose Graduates in Medicine may, on production of the required certificate of study, be admitted to the final examination before the Examining Board in Medicine, Surgery and Midwifery. This places the graduates on the same basis as graduates of the best English colleges.

Methods of Instruction

The course of study in medicine covers six years of thirty-six weeks each. During the first four years those laboratory sciences are pursued which form the basis for the clinical studies of the last two. The objective method is followed in laboratories and clinical instruction, with constant reference to the facts acquired from earlier laboratory work. Emphasis is placed on the individual effort of each student, of whom independent and thoro work is required.

The College affords ample opportunity for thoro instruction. The moderate size of the classes insures close contact between students and instructors. This is of the utmost importance for an exact knowledge of the fundamental branches. The clinical work, in sections, brings the individual student close to the clinical instructors, and affords him an opportunity to study each case at close range, as well as to secure an unusual amount of bedside instruction.

Students are urged to add to their preparation an additional year taken as internes in some hospital, or spent in some laboratory. On completion of this year's work such students may secure a second degree—Doctor of Medicine cum laude.

Admission to the University

Credentials which are accepted toward admission to the University become the property of the University and are kept permanently in the files. All credentials must be filed with the Registrar. They should be mailed at least two months before the beginning of any semester or session to insure prompt attention. Attention to this request will save applicants much inconvenience.

Admission to the University is gained only thru matriculation in one of the ten colleges, (the school of Fine Arts is included in the College of Arts and Sciences).

Admission may be (1) to freshman standing, (2) to advanced standing, and (3) as adult special students.

The requirements for admission to each of the colleges vary only in a small degree except in the case of the College of Law, the College of Medicine, and the College of Dentistry.

For full admission to freshman standing applicants must present 30 entrance points, for conditional admission a minimum of 28 entrance points. (*An entrance point indicates the work of five recitations a week, of 40 to 50 minutes each, for at least eighteen weeks. In laboratory courses an entrance point indicates three recitations and two double periods of laboratory work each week for at least eighteen weeks. In laboratory courses without recitation, an entrance point is the equivalent of fifteen single periods each week.*)

Students admitted conditionally must remove the conditions at the earliest possible opportunity. Degrees will not be granted until such conditions are removed.

Admission by Certificate

Admission may be had by certificate (a) from the secondary schools on the accredited list of the University and (b) from the secondary schools which are members of the North Central Association of Colleges and Secondary Schools, and of accrediting associations of equal rank.

Applicants for admission, who are graduates from secondary schools accredited to the University, must file their "entrance cards" with the Registrar or indicate the name of the school and the year of graduation.

Applicants, who are not graduates but enter from secondary schools accredited to the University must secure and file with the Registrar an officially certified record showing the length of time of attendance, the length of each course in weeks, the number of recitations per week, the length of recitations and grade secured, and also a recommendation from the Superintendent or Principal that the applicant be admitted before graduation.

Applicants from secondary schools which are members of the North Central Association of Colleges and Secondary Schools, and of accrediting associations of equal rank must secure and file with the Registrar an officially certified record showing the length of time of attendance, the length of each course in weeks, the number of recitations per week, the length of recitations and the grade secured, and also whether or not the applicant is a graduate. Graduates of the University Preparatory Course of the School of Agriculture are admitted to full freshman standing in the College of Agriculture.

Admission by Examination

All applicants, other than those mentioned above, for admission to the University are required to take entrance examinations. The High School Inspector holds such examinations during the entire week in which registration occurs.

Entrance Subjects

For admission to freshman standing credit in the following subjects to the amount indicated must be presented:

Required Subjects	Points
English (a)	4
Language (foreign) (b)	{ 4 to 6 }
Mathematics (algebra and geometry) (b)	{ 6 to 4 }
History (European)	2
Science (laboratory) (c)	2
Elective Subjects	
Other subjects taught in an approved manner in an accredited secondary school	12
Total	30

(a) English—This requirement will be increased to six (6) points for all colleges, effective Sept. 1, 1922.

(b) Language and mathematics—

College of Agriculture—Ten points of foreign language and of mathematics are recommended with a minimum of four points in either, but, additional English, history or laboratory science may be offered in place of foreign language.

College of Arts and Sciences—Ten points of foreign languages and of mathematics are required with a minimum of four points in either. In the Academic-Medical course Greek or Latin is recommended.

College of Engineering—Three points of algebra and two points of geometry are required. Additional English, history or laboratory sciences may be offered in place of foreign language.

College of Law—Same as for the College of Arts and Sciences, and in addition thirty college hours of academic work are required. This requirement will be increased to sixty hours, Jan. 1, 1922.

College of Business Administration—Same as for the College of Agriculture.

College of Dentistry—Same as for the College of Arts and Sciences, and in addition thirty college hours of academic work including Chemistry 6 hours, Biology 6 hours, and English 6 hours are required.

College of Medicine—Same as for the College of Arts and Sciences, except that Greek or Latin is recommended, and in addition sixty college hours of academic work, including chemistry 12 hours, four of which shall be organic; English 6 hours; physics 8 hours; zoology 8 hours.

College of Pharmacy—Ten points of foreign language and of mathematics are required, with a minimum of four points in either.

Teachers College—Same as for the College of Arts and Sciences.

(c) Science—

College of Agriculture—Both physics and chemistry are desirable, but a full year of either physics or chemistry should be offered. Students offering only a half year of either cannot continue their study in the College without registering for the elementary course.

College of Engineering—Two points of physics are required and two points of chemistry are desirable.

Admission to Advanced Standing

Applicants for admission from other universities or colleges must file with the Registrar (1) *a letter of honorable dismissal*; (2) *an officially certified statement of the college work already accomplished* showing the length of time in attendance, the length of each course in weeks, the number of recitations or lectures per week, the length of recitation or lecture, the amount of time per week in laboratory courses and the grade secured; (3) *an officially certified record of the secondary school work* satisfying the admission requirements of that College of the University which they seek to enter.

Full credit is given for work completed at institutions which maintain standards of admission and graduation equal to those of this University. Credits submitted from schools that do not have such standards are scaled or adjusted in proportion to the character and standing of such institutions. In every instance, however, the student must complete in residence, in the senior year, and in the college in which he is registered, at least thirty of the 125 hours for graduation.

Advanced credit, in addition to that presented when admission is granted, must be submitted for approval within one year from date of matriculation.

College credit is given for work done in a secondary school only upon examination and then for a maximum of nine hours elective credit, and only in chemistry, Greek, mechanical drawing, solid geometry, trigonometry, third and fourth year German, French and Latin, and fourth year English. To receive college credit for such work, application must be made at the time of first registration in the University and the examination must be taken by the end of the first semester.

Admission as "Adult Special" Students

Persons at least 21 years of age who cannot fulfill the regular admission requirements for freshman standing, but who present an equivalent academic training, or who have otherwise acquired adequate preparation for collegiate courses, may be admitted to the University as "Adult Specials." Such admission shall be approved by the Dean of the College which applicant desires to enter. Adult specials are subject to the same regulations as regular students in respect to military science or physical training or eventual graduation requirements.

Admission to the Medical College Proper

For admission to the College of Medicine proper, applicants must present sixty hours of college work, representing an attendance at an approved college for two college sessions each consisting of at least thirty semester hours, extending thru two years of thirty-two weeks each, and in addition, thirty entrance points. The subjects included in two years of college work shall be in accordance with the following schedule:

Required Subjects:	Semester Hours
Chemistry	12
Four hours of which shall be organic Chemistry.	
Physics	8
Biology (only 4 hours may be Botany)	8
English	6

Electives

A modern foreign language, advanced zoology, psychology, algebra and trigonometry, or additional chemistry.

For medical entrance a credit hour is defined as follows:

A credit hour is the equivalent of one hour of recitation, quiz or lecture per week for one semester or two hours of laboratory work per week for one semester.

Credit Requirements

A student shall complete in residence and in the senior year at least thirty-six of the total hours required for graduation.

In accordance with the recommendation of the Association of American Medical Colleges, the College of Medicine does not grant any time credit toward the M.D. degree to holders of a bachelor's degree; this means that the total time spent by each student taking his medical degree must include as a minimum four years of registration in a medical college.

The granting of subject credit is at the discretion of the chairman of each department, subject to the meeting of such conditions or the passing of such examinations as he may with reason impose. Admission to any class does not necessarily carry with it credit in all work previously done by the class, since the chairman of any department has the right to demand satisfactory evidence of the completion of previous work in that subject equal to that required of the student of this College, and in case the work is not equal to such requirement the deficiency stands against the student as a "condition" till removed.

Advanced credit, in addition to that presented when admission is granted, to be accepted must be submitted for approval within one year from date of matriculation.

Combined Academic and Medical Courses
Course Leading to the Degrees of B. Sc. and M. D.

By the use of the laboratory subjects of the third and fourth years of the medical course as electives in his collegiate course the student is enabled to receive, at the end of four years, the degree of Bachelor of Science and at the end of six years that of Doctor of Medicine. This, however, can only be accomplished by following exactly the course as outlined below, substitution being permitted rarely and under conditions where insistence upon the strict enforcement of the requirements would cause evident injustice. Any student failing to meet these requirements can secure his B. Sc. degree only by meeting the group requirements of the College of Arts and Sciences.

SUGGESTED SEQUENCE OF SUBJECTS
PRE-MEDICAL COURSE

FIRST YEAR

	First Semester Hours	Second Semester Hours

Course Leading to the Degree of A. B. and M. D.

A student registering for the degree of Bachelor of Arts may arrange a course similar to the course leading to the degree of B. Sc. and M. M. by the same use of his electives, but seven years are neces-

sary to meet the requirements for the Bachelor of Arts degree and to secure, at the same time, the scientific training required for the degree in medicine.

A student entering this University from another in which is offered a six-year combined course substantially equivalent to the one here outlined, may be registered in this course, on presentation of properly authenticated credentials showing the satisfactory completion of all requirements of the institution from which he comes.

Registration

Certain days at the beginning of each semester are allowed for registration. To promote prompt registration, a fee of \$3.00 is charged any student who, unless excused by the Dean, seeks to register outside of these days. A fee of \$1.00 is charged for reregistration when made necessary by the student's fault. Any change whatever in a registration once made is regarded as a re-registration. A student taking the college work required for entrance to the College of Medicine matriculates and registers in the College of Arts and Sciences until the necessary amount of college work is completed. A student taking the combined six-year course for the degrees of Bachelor of Science and Doctor of Medicine matriculates and registers only in the College of Arts and Sciences during the first two years of his work. He continues to register in the College of Arts and Sciences during the next two years, or until he receives his B. Sc. degree; but he must also matriculate and register in the College of Medicine at the beginning of the third year's work and must register regularly thereafter in the College of Medicine. If he is a candidate for the A. B. degree, he must begin to register also in the College of Medicine not later than the beginning of the fourth year of his course, as at least four year's registration in a college of medicine is required of all who receive the M. D. degree. No regular student is registered for less than twelve (12) hours a semester without the Dean's permission, nor under any conditions for more than eighteen (18) hours. No student may add any subject to his schedule or drop from it any subject for which he has been regularly registered, without written permission from the Dean. Students cannot attend classes for which they are not registered and credit is not granted for studies pursued without registration. Any change in a student's residence must be immediately reported to the Dean.

Class Standing and Examination

The standing of a student in any course is determined by the instructor in charge of the subject thru examinations, personal contact and observation of routine work. The passing grade for subjects of the third and fourth years is 70 per cent and for the fifth and sixth

years is 75 per cent. A grade between 60 and 70 per cent constitutes a "condition". A grade below 60 per cent or the failure to remove a "condition" constitutes a "failure" and the subject must be repeated in course.

A course, which for a good reason has not been completed, may, if of passing grade, be marked "incomplete". Such "incomplete" must be removed by the end of the first semester in which the course is again offered or it becomes a failure.

Whenever at the middle or end of any semester a student is delinquent in half or more of his registered hours, his name is automatically dropped from the rolls of the Medical College and his registration cancelled.

Any student who has an unabsolved failure in any major subject of the third or fourth year will not be permitted to enter the fifth year except by recommendation of the Delinquency Committee.

Attendance on less than 80 per cent of the scheduled lectures and recitations or 85 per cent of the scheduled laboratory and clinical hours constitutes a "condition" in any course and shall be so reported.

When the removal of a "condition" requires examination such supplemental examination shall be held at the end of the spring vacation or during registration week of the following September. The fee for the removal of each condition is \$5.00.

If a student fails to pass the supplemental examination he is "failed" in the course, and shall not have the privilege of a re-examination. If he is "failed" in any course a second time, he shall not have further privilege of instruction or examination in this College except by special recommendation of the Delinquency Committee.

When the general average grade of any student's work is unsatisfactory the Delinquency Committee may reduce the registration for the next semester or recommend to the Dean that he be refused registration.

No student coming from another school will be allowed any privileges in this school which were denied him in the one which he leaves.

Absence or Withdrawal

The Dean of the College of Medicine is the Adviser of all students in the College of Medicine. He has a consultation hour, when students may call seeking advice touching their work. A leave of absence for a short time may be granted a student by the Dean of his College. This is merely a justification for absence and not an excuse from any work. If a student in good and honorable standing finds it necessary to withdraw from the University before the close of a semester, the Dean grants him permission to do so. If he is in good

standing and is not a minor he is given honorable dismissal from the University at his own request; if a minor, at the request of his parents or guardian.

REQUIREMENTS FOR GRADUATION

The degree of Doctor of Medicine is granted only under the following conditions:

1. The candidate must be at least twenty-one years of age.
2. He must possess a good moral reputation.
3. He must have complied with all the requirements of admission.
4. He must have pursued the study of medicine for at least four years and must have passed the necessary examinations and have received credit for at least four full years of instruction at medical colleges in good standing. The last year he must have taken in this institution.

GRADUATE WORK

Graduate work of two types is offered in the College of Medicine.

(1) Advanced study and research in one or more of the laboratory departments by students holding baccalaureate degrees from this institution or from some other university or college. Such study may lead to the degree of Master of Arts or of Doctor of Philosophy and may be carried at the same time in a lengthened period of residence as part work in the regular medical schedule. The departments offering this work are included in the Graduate College of the University, the general requirements of which must be met by all candidates for these degrees.

(2) Work of a clinical character by graduates in Medicine serving internships or by graduates in Medicine working under direct faculty supervision. Such work may lead to the degree of Doctor of Medicine *cum laude* under the following conditions laid down by the faculty of the College of Medicine. The candidate must apply at the beginning of his internship or at least one year before he expects to come up for such degree; his work shall consist of original clinical data or experimental work together with general reading and critical survey of the literature bearing on his special subject, and shall be embodied in a typewritten thesis which, if accepted, shall be deposited in the Medical College library; the subject and preliminary outline of the work shall be approved by the faculty committee on graduate study, and throughout the year the work shall be under the supervision of two advisers appointed by the committee with the condition that one shall be a member of the laboratory faculty and the other (if candidate is an interne) the chief of staff of the hospital in which interne

is serving; the final acceptance of the thesis shall be by unanimous vote of the faculty and only after its recommendation by the advisory committee and after an opportunity for its inspection by all members of the faculty.

FEES

All fees excepting the diploma fee are payable in advance, to the secretary of the College. No fees can be refunded to a student after the beginning of the fourth week from the date of his registration, save for causes beyond the student's control; in the latter case the refund can only be made upon written application to the Dean. The application must state the reason and be presented at the time of withdrawal from a course or the college. The scheduled fees in the College of Medicine are as follows:

Matriculation fee (charged once only for each degree)	\$ 5.00
Diploma fee	5.00
Diploma fee, absentia, additional.....	10.00
Diploma, "cum laude", fee.....	10.00

No person can be recommended for a degree until he has paid all fees, including the fee for the diploma.

THIRD YEAR

Tuition, first semester.....	\$65.00
Tuition, second semester.....	60.00
Breakage fee	10.00

FOURTH YEAR

Tuition, first semester	\$60.00
Tuition, second semester.....	60.00
Breakage fee	10.00

FIFTH YEAR

Tuition, first semester.....	\$55.00
Tuition, second semester.....	55.00
Breakage fee	10.00

SIXTH YEAR

Tuition, first semester.....	\$55.00
Tuition, second semester.....	55.00
Breakage fee	10.00

(Unused portion of breakage fee is returnable.)

For elective courses requiring laboratory space, apparatus and material, an extra fee is charged. This fee is by agreement between the student and the chairman of the department, and is based on the

amount of material required. Special course fees or the fees of students taking part-time work is pro-rated on the basis of the number of hours of work. In no case is the fee more than fifteen cents for each hour of work. The minimum fee, however, is \$10.00. Breakage in the laboratory and damage to the College property is charged to the individual or class responsible. In case the responsibility for the damage cannot be placed it is charged to the class pro-rata.

EXPENSES

Board may be obtained in the vicinity of the College building at an average of \$6.00 per week. Comfortable rooms for individuals cost from \$8.00 to \$15.00 a month. Students rooming together may by this means obtain comfortable rooming quarters at approximately \$7.00 per month each. The total expense of the student for the school year, exclusive of books and instruments, including all fees, is between \$385 and \$650. Many students expend more than this, some expend much less. Students should provide an allowance of \$50 per annum for books and instruments.

The Young Men's Christian Association offers to students in the College of Medicine special season tickets at a very small cost, granting the privileges of the Association Building. In a city the size of Omaha there are many opportunities for the students to defray a part of their expenses. The College of Medicine does not, however, guarantee employment. Thru the Young Men's Christian Association, the Omaha Chamber of Commerce and other agencies, employment is obtained for a certain number of students.

LABORATORY FACILITIES

Anatomy—The department of Anatomy occupies the third and fourth floors of the north laboratory building. The rooms are well lighted and ventilated. The "unit room" system—each unit accommodating eight students—has been adopted as being superior to that of a large common dissecting room. The State Anatomical law provides ample material for dissection. In the laboratory for microscopical anatomy individual desks, lockers, reagents, etc., are at the student's command, as are also excellent collections of histological and embryological material, models, charts, journals, etc.

Biochemistry—This department, located on the fourth floor of the south laboratory, is amply equipped with the most modern scientific apparatus. It also has special research laboratories equipped with calorimeter, thermostat, automatic burettes, electric stoves, etc. A balance room and rooms for combustion, calorimetric and Kjeldahl work may also be mentioned.

Pharmacology—Experimental pharmacology occupies the second floor, south laboratory building. The chemical and pharmaceutical work of the student is carried on in this laboratory. The department's equipment includes private laboratories for experimental work.

Pathology and Bacteriology—This department occupies all of the second floor, north laboratory building, and has two large teaching laboratories for bacteriology and general pathology of the fourth year and for clinical and special pathology of the fifth year. Ample facilities, such as microscopes and other apparatus, are provided for each student.

Physiology—The main physiology laboratory in the south laboratory building accommodates forty students in each section, and separate tables with lockers are provided for each pair of students. The room for mammalian experimentation accommodates thirty-two students. For research work and special experiments several additional rooms provide abundant space. The work shop, the instrument room, and the photographic room are all provided with every working convenience.

CLINICAL FACILITIES

The University Hospital—The establishment of this hospital on the Medical campus makes possible the closest correlation between clinical and laboratory teaching. The hospital, thoroly modern in every respect, contains 130 beds thus amply providing for the care of a great variety of cases. The control of the hospital rests wholly with the Board of Regents and it is administered by the College of Medicine.

The University Free Dispensary—is located in the south laboratory building. Separate services, each having its own rooms and equipment, are provided in internal medicine; surgery; eye, ear, nose and throat; pediatrics; gynecology; obstetrics; dermatology and genito-urinary diseases. There is also an out-patient department, which answers many calls from the Visiting Nurses' Association and the Associated Charities of Omaha. Over 16,000 dispensary cases were cared for during the year 1920-21.

The Child's Saving Institute—This institution containing seventy beds, erected on a portion of the Medical campus, lies directly across the street from the south laboratory building. Valuable clinics in infant feeding and the nutritional diseases of childhood are afforded by the institute.

Extra Mural Hospitals—Clinical teaching is scheduled at the Nebraska Methodist Hospital and at the Clarkson Memorial Hospital. The Methodist Hospital is a modern fire-proof structure of two hun-

dred and fifty beds and is well equipped with laboratories, clinic rooms, etc. The Clarkson Memorial Hospital, of eighty beds, a thoroughly modern institution, affords high grade instruction in selected cases. Additional available hospitals are the Wise Memorial, Douglas County, Immanuel and City Emergency.

Hospital Appointments—Graduates of the College of Medicine are afforded a wide choice in the selection of internships. Approximately twenty internships are available in the Omaha hospitals above mentioned. For several years past, practically every graduate of the College of Medicine has served an internship of at least one year. Internships have been secured in several of the hospitals of New York City, Philadelphia, Buffalo, Pittsburg, Detroit, Cincinnati, Los Angeles, Kansas City, etc. The demand for internes is greater than the College has ever been able to supply.

ADDITIONAL INFORMATION

Public Health—The College of Medicine stands ready to supply expert advice in co-operation with the state and local departments of health on the general health conditions within the state. Members of the faculty of the College of Medicine will respond whenever possible for addresses on medical subjects of general interest. These addresses are available for Teachers' Associations, Women's Club meetings and the like.

The University College of Medicine is keenly alive to the possibilities which lie within the general theme "Conservation of Public Health" and every effort is made to bring important advances along the lines of better living before the people.

Bulletins on Public Health—The Conservation of Public Health Series is issued quarterly by the College of Medicine. Titles of the bulletins so far issued are as follows:

- Number 1. Hints on Home Nursing for Babies.
- Number 2. Everyday Facts about Tuberculosis, Typhoid, and Cancer.
- Number 3. Hygiene of the Child—Colds, Whooping-cough, Measles.
- Number 4. Hygiene of the Child—Eyes, Ears, Nose.
- Number 5. Hygiene of the Child—Scarlet Fever, Diphtheria.
- Number 6. "Spanish" Influenza.

Copies of these bulletins will be sent to any address upon request.

The College of Medicine Library—The Medical College Library represents one of the strongest and most distinctive features of the Medical School. Ideally located in a cool, and quiet wing of the hos-

pital building and within easy access from the various laboratories it stands as a vital, common interest to the laboratory and clinical branches of medical instruction. The library equipment is modern in every respect. Accessions, cataloging and indexing are in charge of a competent, expert librarian. The 16,000 bound volumes and more than 10,000 unbound pamphlets, reprints and theses are the result of purchases and acquisitions extending over a period of more than half a century and represent the mature judgment, as to valuable medical literature, of many specialists. There has thus been built up, not only a very valuable research library, but one which offers students abundant opportunities for additional reading and study. One hundred and thirty standard, scientific periodicals are on the regular subscription list.

Incidental to its ordinary functions the library has, in recent years, laid emphasis on the acquisition of material of historic interest, including books and surgical instruments. The library recently acquired over one hundred and fifty rare etchings, copper plate engravings, lithographs, etc., of the great men who were the master minds in medicine. Incorporated within the library of the College of Medicine are 2000 volumes of the Omaha-Douglas County Medical Society and 1500 volumes of the State Medical Society.

The University Library, in Lincoln, containing over 140,000 volumes is freely accessible to students and faculty in Omaha. Books may be withdrawn at any time upon demand. Likewise thru the Medical College librarian it is possible for short periods to draw upon the resources of the John Crerar Library of Chicago or the Surgeon General's Library at Washington. The State Library of 75,000 volumes at the State Capitol and the Nebraska State Historical Society Library of 65,000 volumes include valuable medical works in certain lines; series of public documents such as reports of state boards of health and of state hospitals and other institutions.

The Alumni Association of the University of Nebraska College of Medicine maintains an active organization with headquarters in Omaha. The Association numbers about five hundred members.

Medical Student Fraternities. Nu Sigma Nu, Phi Rho Sigma, Phi Chi and Phi Beta Pi have active chapters and each maintains a chapter house.

The Medical Sorority is Nu Sigma Phi.

Alpha Omega Alpha. Nebraska Alpha Chapter of Alpha Omega Alpha, the medical honorary fraternity, is located at the University of Nebraska College of Medicine. Election to membership in this society

occurs at the end of the first semester, sixth year, and is based upon the scholarship record of the last four years of the medical course.

Medical History Society. A student society, open to members of the Junior and Senior classes, meets bi-weekly for the study of the history of medicine.

Pre-Medical Society. A large pre-medical society has existed for a number of years among the students in the pre-medical courses at Lincoln. This society meets monthly for an informal evening at which time addresses are made by members of the faculty. Usually some member of the clinical faculty from Omaha is in attendance.

Museum—The pathological museum of the College of Medicine contains about 2500 specimens. Nearly every variety of pathological lesion is represented and fresh material is regularly received from the affiliated hospitals. From the autopsies performed by the staff, averaging one hundred per year, much valuable material is obtained. The museum is an important and necessary adjunct to the teaching of pathology and of clinical medicine.

The anatomical museum consisting of models, charts and mounted specimens, is housed in the quarters of the department of anatomy, where it is readily accessible to the students of the department.

Journal Club—The members of the Laboratory Staff conduct a Journal Club.

Student Loan Fund—This is a private foundation to aid students to complete their college work in residence at the University—a private enterprise administered by the Board of Regents. The present donors are John A. Waddell of Kansas City, Mo.; John R. Webster of Omaha; William G. Whitmore of Valley, Nebr., \$1,000 each, and Mrs. A. E. Carter of New York City, \$500. For further information apply at the Secretary's office.

Scholarships—Scholarships are awarded in the various departments in return for students' assistance. Applications for scholarship should be made to the Dean or Chairmen of departments.

Jetur Riggs Conkling and Jennie Hanscom Conkling Foundation—The will of the late Clementine C. Conkling provides for the creation of a Trust to be known as the "Jetur Riggs Conkling and Jennie Hanscom Conkling Foundation," the income of which shall be used by the Regents of the University of Nebraska in providing scholarships for deserving medical students. Scholarships may be awarded only after the close of the students' first year in the Medical School.

Under the stipulations of the Trust, students who have completed the freshman medical year in good standing may apply for a scholar-

ship. Scholarships will not exceed the sum of two-hundred dollars per year. Applications for scholarships should be addressed to the Dean.

COURSES OF STUDY

The course of study outlined is constructed in accordance with the recommendations of the Council on Medical Education of the American Medical Association and of the Association of American Medical Colleges. The experience of the best medical colleges of the country, has been freely utilized. Logical sequence, relative stress and attention devoted to studies, with economy of the students' time and energy, have been carefully weighed and considered.

DISPENSARY AND CLINICAL CLERKSHIPS

During the fifth and sixth years, students in small groups are assigned, in rotation, to dispensary and clinical clerkship services according to the following schedule,—

A	B	C	D	E	F	G	H	I	J	K
1	2	3	4	5	6	7	8	9	10	11
2	3	4	5	6	7	8	9	10	11	1
3	4	5	6	7	8	9	10	11	1	2
4	5	6	7	8	9	10	11	1	2	3

In the assignment scheme the numerals represent student groups while the letters represent the various services. Each service is of one month's duration and one of the following eleven,—A=Medicine at Dispensary; B=Medicine at Hospital; C=Surgery at Dispensary; D=Surgery at Hospital; E=Gynecology; F=Pediatrics and Nervous and Mental Diseases; G=Eye, Ear, Nose and Throat; H=Urology; I=Laboratory; J=Drugs; and K=Receiving and Out-calls.

SUMMARY OF COURSES OF THE THIRD, FOURTH,
FIFTH AND SIXTH YEARS

THIRD YEAR

First Semester

Course	Character	Total Hours	Credit Hours*
Anatomy 1.....	Gross Dissection.....	180	6.3
Anatomy 3.....	Embryology	90	3.4
Anatomy 4a.....	Histology	100	3.6
Pathology 1.....	Bacteriology	130	4.7
Total hours of semester.....		500	
Total credit hours.....		18	

Second Semester

Course	Character	Total Hours	Credit Hours
Anatomy 2.....	Gross Dissection.....	280	10.4
Anatomy 4b.....	Organology	120	4.
Anatomy 5.....	Neurology	100	3.6
Total hours of semester.....		500	
Total credit hours.....		18	
Total hours of third year.....		1000	

FOURTH YEAR

First Semester

Course	Character	Total Hours	Credit Hours
Physiology 1 & 2.....		285	9
Bio-chemistry 1 & 2.....		200	7
Pathology 2.....		50	2
Total hours of semester.....		535	
Total credit hours.....		18	

*A "credit hour" is given for each one hour recitation or lecture which presupposes two hours of preparation, or for the equivalent of a three hour laboratory period during each of the 17 weeks of a semester.

Second Semester

Course	Character	Total Hours	Credit Hours*
Physiology 3.....	Normal Physical Diagnosis....	45	1.2
Pharmacology 4a-b-c.....		170	5.4
Pathology 3.....		220	8.5
Ophthalmology 1.....		6	.2
Obstetrics 1.....		24	.9
Medicine 2.....		34	1.2
Pediatrics 1.....		17	.6

Total hours of semester..... 516

Total credit hours..... 18

Total hours of fourth year.....1051

FIFTH YEAR

First Semester

Course	Total Hours
Dispensary	56
Gynecology 5.....	17
Internal Medicine 3-10b (Physical Diagnosis).....	51
Internal Medicine 5a-b-c-10a.....	136
Laryngology 1-3.....	17
Nervous and Mental Diseases 1.....	17
Nervous and Mental Diseases 3 (Psychiatry).....	17

ANATOMY

Professors Poynter (*Chairman*), Willard, Doctor Latta
Mr. Lynch and Assistants

In this department instruction is given in gross anatomy, histology, embryology and neurology. The work of the department extends thru the third year.

All instruction is based on laboratory work carried out under the supervision of the staff. Lectures covering subjects of broad morphological significance are given before the entire class but for the discussion of details, in conjunction with laboratory work, the class is subdivided into small groups. Every effort is made to correlate the work in gross and microscopic anatomy.

1, 2. **Gross Anatomy**—Study of the human body with complete dissection in the laboratory. The work is so arranged as to insure proficiency in technique as well as a proper understanding of the subject. Lectures, conferences and laboratory—460 hours.

3. **Embryology**—Brief survey of the fundamental facts of vertebrate development and their application to the problem of human morphogenesis and histogenesis. The work on general development is based on the study of the chick and pig; in organology this material is largely supplemented with human tissues. Recitations, lectures and laboratory—90 hours.

4a and b. **Histology and Organology**—Microscopic analysis of the gross structure of the body. Study of normal human material supplemented by various other mammalian tissues. The relation between structure and function is constantly emphasized. An individual loan collection is furnished each student. Lectures, quizzes and laboratory—220 hours.

5. **Neurology**—Study of the gross and microscopic anatomy of the central nervous system. Dissections of the human brain, study of microscopic sections and reconstructions of the principal functional paths. The lectures aim to develop those features which are not susceptible of laboratory demonstration and which have a direct bearing on the later work of the curriculum. Lectures and laboratory—100 hours.

6. **Graduate Courses**—Facilities are available for research on special problems within the field of the department, such work leading to graduate degrees under the rules of the Graduate College of the University.

Note—All elective courses must be specially arranged for; time and credit to be arranged for at time of registration.

BIOCHEMISTRY

Professors—Cutter (*Chairman*), Morgulis and Assistants

Courses 1 and 2 aim to equip the student with the necessary technique for the application of chemistry to clinical medicine as well as to acquaint him with the elementary facts of biological chemistry. The advanced courses provide for special study and research in the application of biochemical methods and principles to the problems of both practical and scientific medicine. Special attention will be given to problems of chemical pathology as they can be approached by the method and technique of physical chemistry including especially the applications of colloid chemistry.

The courses of the department are designed:

A. To give a fundamental training in biological (physiological) chemistry in the regular curriculum of the medical student.

B. To afford means for students of biological chemistry, not candidates for the degree of medicine, to obtain the necessary credits for the degrees of A.M. or Ph.D. All students who are candidates for a degree are expected to take courses 1 and 2 unless the content of these courses has been covered elsewhere in an acceptable manner.

C. To offer the facilities of the laboratory to physicians and students, whether medical or non-medical, for special work on selected topics or methods in biochemistry, independently of the requirements for a degree.

1. **Physical and Biological Chemistry**—Biochemical substances and processes and their chemical and physiological relations to medicine. Work presupposes preparation in analytical and organic chemistry. First semester, fourth year, first six weeks, four conferences per week. Laboratory. Total 72 hours.

2. **Biological Chemistry**—Course 1 continued. Tissues, foods, nutrition and metabolism, both normal and pathological. Quantitative and micro-chemical methods used. Assigned individual chemical problems on the human or animal body. First semester, fourth year, following eleven weeks, four conferences per week. Laboratory. Total 132 hours.

3. **Special Topics in Chemical Pathology**—Laboratory and conference work on special topics or methods selected to meet the needs of physicians and advanced students. Hospital cases and normal individuals are experimentally studied with reference to both normal and pathological chemical conditions of blood, urine and metabolism. Hours and topics to be arranged individually.

4. **Research in Physical, Biological or Pathological Chemistry**—Hours and subjects of investigation to be arranged individually.

4a. A specific experimental problem comprised in the above topics.

4b. A descriptive and conference course on colloid chemistry.

DERMATOLOGY AND SYPHILOLOGY

Professor Schalek (*Chairman*), Doctor Tomlinson

A thoro foundation in dermatology and syphilology is laid by lectures, quizzes and demonstrations. At the University Dispensary the students are brought in personal contact with patients of whom they take entire care under the supervision of the attending physician. A large and carefully selected collection of plates and photographs is available for lantern use.

1. **Dermatology**—Lantern demonstrations of the various skin lesions, together with lectures and recitations upon their etiology, pathology and treatment. Total 34 hours. First semester, sixth year.

2. **Dermatology and Syphilology**—A weekly clinic at the University or Douglas County Hospital. Demonstration of patients, discussion of treatment. Total 17 hours. Second semester, sixth year.

3. **Dermatology and Syphilology**—Examination of patients and treatment by students under supervision of attending physician, at University Dispensary. First semester, fifth and sixth year.

4. **Dermatology and Syphilology**—Course 3 continued. Second semester, fifth and sixth year.

GYNECOLOGY AND OBSTETRICS

Professor Pollard (*Chairman*), Doctors Waters, Taylor and Sage

The instruction in diseases of women consists largely of practical demonstrations. The dispensary clinic, held at the University Free Dispensary, is regarded as a most important part of the clinical teaching. It is in these clinics that the student is trained in clinical diagnosis and where he may best be instructed in principles of treatment. The University Hospital affords abundant opportunity for the assignment of obstetric cases to members of the sixth year class under direction. During such attendance the student is excused from other College exercises. Under direction and in presence of the professor or one of his assistants, he makes examination, both by abdominal and vaginal palpation, suggests diagnosis, studies the progress of labor and in case operative procedure is necessary, witnesses and assists at operations. Clinics are held at which students are taught antepartum diagnosis, physiological and pathological pregnancy, and shown cases of interest that may be under observation at the time. Written reports of all clinical work are required and each student must have reported twelve cases of confinement before coming up for graduation.

1. **The Physiology of Pregnancy, Labor and the Puerperium**—Hygiene and conduct of pregnancy, normal labor and puerperium and the physiology and the care of the new-born child. Total 24 hours. Second semester, fourth year.

2. **Pathology of Pregnancy, Labor, Puerperium and of New-born Child**—Total 34 hours. First semester, fifth year.

3. **Pathology of Pregnancy, Labor, Puerperium and of New-born Child**—Course 2 continued. Total 34 hours. Second semester, fifth year.

4. **Obstetrics**—The hemorrhages, antepartum, intrapartum and postpartum. The toxemias. Review of use of forceps with special applications. Total 34 hours. First semester, sixth year.

5. **Gynecology**—The subject is covered by didactic lectures and recitations. These are supplemented by lantern demonstrations, instruments, casts and pathological specimens. Total 17 hours. First semester, fifth year.

6. **Gynecology**—Course 5 continued. Total 17 hours. Second semester, fifth year.

7 a-b. **Gynecology**—Dispensary, where small groups of students are permitted to examine patients and to apply local treatment. First semester of fifth and sixth years.

8 a-b. **Dispensary**—Second semester of fifth and sixth years.

INTERNAL MEDICINE

Profesors Crummer(*Chairman*), W O. Bridges, and Milroy, Assistant Professors Bliss, Banister, Bridges, and Anderson, Doctors Conlin, Hall, Pratt, Johnson, Allen, Niehaus and Moser

1. **Physical Diagnosis**—(See Physiology 3).
2. **Principles of Medicine**—A recitation course upon the general symptomatology of disease. Total 34 hours. Second semester, fourth year.
3. **Physical Diagnosis**—Physical signs in disease, and their clinical demonstration on cases taken from dispensary and hospital wards. Two hours clinic, (10b) one hour quiz. Total 51 hours. First semester, fifth year.
4. **Physical Diagnosis**—3 continued. Two hours clinic, (12b). Total 34 hours. Second semester, fifth year.
- 5a. **Internal Medicine**—2 continued. Total 34 hours. First semester, fifth pear.
- 5b. **Internal Medicine**—5a continued. Total 34 hours. First semester, fifth year.
- 5c. **Internal Medicine**—Clinic. See 10a. Two hours. Total 34 hours. First semester, fifth year.
- 6a. **Internal Medicine**—5a continued. Total 34 hours. Second semester, fifth year.
- 6b. **Internal Medicine**—5b continued. Total 34 hours. Second semester, fifth year.
- 6c. **Internal Medicine**—Clinic. See 12a. Total 34 hours. Second semester, fifth year.
7. **Military Medicine**—Distribution, etiology, diagnosis, and treatment of such tropical diseases as are of practical importance to American physicians. The endemiology and epidemiology of such diseases with the general and special sanitary measures adapted to the prevention, control and suppression of the same. Two hours lecture. Total 34 hours. First semester, sixth year.
8. **Military Medicine**—7 continued. Two hours lecture. Total 34 hours. Second semester, sixth year.
9. **Medical Conference and Life Insurance Examinations**—The nature and growth of life insurance; elementary principles of life insurance; duties and responsibilities of examiners; influence of different diseases, heredity, occupation and habits on expectancy of life; proper technic in examining applicants for life insurance. One hour. Total 17 hours. Second semester, sixth year.

10. **Internal Medicine Clinics**—First semester. Fifth year.
 - a. University Hospital. Two hours. Total 34 hours.
 - b. University Hospital. Two hours. Total 34 hours.
 - f. Dispensary and Clinical Clerk Service.
 11. **Internal Medicine Clinics**—First semester. Sixth year.
 - c. University and Methodist Hospitals. Total 34 hours.
 - d. University Hospital. Total 34 hours.
 - f. Dispensary and Clinical Clerk Service.
 12. **Internal Medicine Clinics**—Second semester. Fifth year.
 - a. University Hospital. Total 34 hours.
 - b. University or Douglas County Hospitals. Total 34 hours.
 - f. Dispensary and Clinical Clerk Service.
 13. **Internal Medicine Clinics**—Second semester. Sixth year.
 - c. University Hospital. Total 34 hours.
 - d. University Hospital. Total 34 hours.
 - f. Dispensary and Clinical Clerk Service.
 14. **Review Course**—A course covering a general review of Medicine. Use of outlines, case reports, histories, etc., with thoro correlation with pathology. Total 34 hours. Second semester, sixth year.
- All clinics are held in University Hospital unless otherwise noted.

LARYNGOLOGY AND RHINOLOGY

Professors Owen (*Chairman*), Doctors Potts, Wherry, Knode, Rubendall, Owen and Potter

1. **Physiology and Appearance of Nose, Throat and Larynx**—Examination of each with special reference to the normal. Use of instruments. One hour lecture and demonstration. Total 17 hours. First semester, fifth year.
2. **Diseases of the Nose, Throat and Larynx** with pathology, diagnosis and treatment. One hour lecture. Total 17 hours. Second semester, fifth year.
3. **Diseases of Nose and Throat**—One and one-half hours clinic. First semester, fifth year in sections.
4. **Diseases of Nose and Throat**—One and one-half hours clinic. Second semester, fifth year in sections.
5. **Dispensary**—Services of one month. First semester, fifth and sixth years.
6. **Dispensary**—Course 5 continued. Second semester, fifth and sixth years.

MEDICAL JURISPRUDENCE

Mr. Hascall, Mr. Thomas

1. **Medical Jurisprudence**—Physicians' contracts, general medico-legal relations. Expert testimony. Malpractice. Injuries and deaths. Identity, and survivorship. Sexual relations. Quarantine, sanitation. Medical legislation. Seventeen lectures. Second semester, sixth year.

NERVOUS AND MENTAL DISEASES

Professor Young (*Chairman*), Doctors Wigton and Mogridge

The course in nervous and mental diseases which extends thruout the junior and senior years, aims primarily at giving the student the ability to make a comprehensive neurological or psychiatric examination of any patient. This is held to be of essential importance and implies a working knowledge of the anatomy and physiology of the nervous system and of the symptoms resulting from pathological conditions affecting the principal centers and tracts. Secondly, thru the rich clinical material of the University Hospital and the psychiatric ward of the Douglas County Hospital it gives ample opportunity for first hand contact with cases illustrative of the chief types of organic and functional nervous diseases and of the psychoses.

1. **Neurology**—Lectures and quiz-lectures covering method of case taking, etiology, pathology, symptomatology and treatment of the organic and functional nervous diseases. 17 hours. First semester, fifth year.

2. **Neurology**—Course 1 continued. 17 hours. Second semester, fifth year.

3. **Psychiatry**—Lectures and quiz-lectures on the psychoses and feeble-minded states; etiology, symptomatology and treatment. 17 hours. First semester, fifth year.

4. **Psychiatry**—Course 3 continued. 17 hours. Second semester, fifth year.

5. **Clinics at University Hospital and Psychiatric Ward of Douglas County Hospital**—Case histories presented by students at clinics; demonstration of neurological and psychiatric disease entities; discussion and quizzes on diagnosis and treatment. Seventeen two hour periods. First semester, sixth year.

6. **Clinics**—Course 5 continued. Seventeen two hour periods. Second semester, sixth year.

7. **Dispensary**—Out-patient clinic. Histories taken and cases worked up by students assigned to individual patients. First semester, sixth year.

8. **Dispensary**—Course 7 continued. Second semester, sixth year.

OPHTHALMOLOGY AND OTOTOLOGY

Professor Gifford (*Chairman*), Associate Professor Patton, Doctors Lemere, Lindquist, Callfas, James and S. Gifford

1. **Ophthalmology**—General examination of the eye with special reference to the normal. Principles of refraction with practical exercises in groups at dispensary. Use of ophthalmoscope, etc., with practical demonstrations. One hour lecture. Total 6 hours. Second semester, fourth year.

2. **Ophthalmology**—Diseases of the eye, symptomatology and diagnosis. Lecture and quiz. Total 21 hours. First semester, fifth year.

3. **Otology**—Special diagnostic methods with use of instruments. Non-surgical diseases of the ear. Total 12 hours. Second half, first semester, fifth year.

4. **Diseases of the Eye and Ear**—Lectures and clinics at University and Methodist Hospitals. Cases followed by clinical clerks on service. Treatment and diagnosis. Two hours. Total 34 hours. First semester, sixth year.

5. **Operative Course on Animal Eyes**—Elective. One hour. Second semester, sixth year.

6. **Ophthalmoscopy**—Course designed to meet demands of ophthalmoscopic diagnosis in internal medicine. 12 hours. Elective for sixth year students.

8. **Dispensary**—Fifth and sixth years.

ORTHOPEDIC SURGERY

Professor Lord (*Chairman*), Doctor Schrock

1. **Orthopedic Surgery**—Diseases of bones and joints, synovial membranes and bursae. Congenital, acquired and disease producing deformities. Prevention of deformities and dystrophies with principles of treatment. Illustrated by photographs, slides, etc. One hour. Total 17 hours. First semester, sixth year.

2. **Orthopedic Surgery**—Two hour clinic and quiz. University Hospital. Total 34 hours. Second semester, sixth year.

PATHOLOGY AND BACTERIOLOGY

Professors Eggers (*Chairman*), Assistant Professors Keegan, Myers, Dr. Weinberg and Assistants

1. **Medical Bacteriology**—A lecture and laboratory course on the cultural characteristics, pathogenic properties, etc., of bacteria in general, with special reference to those of importance in disease. Total 130 hours. First semester, third year.

2. **Medical Bacteriology**—1 continued. Lecture and laboratory course on the principles of infection and immunity. Total 50 hours. First semester, fourth year.

3. **General Pathology**—A lecture and laboratory course on the study of general disease processes. It comprises: a study of the general principles of pathology; a study of disease processes in detail, in class room and laboratory. 140 hours laboratory, 80 hours class work. Second semester, fourth year.

4. **Special and Clinical Pathology**—A study of the effects of pathological processes affecting organs and systems. Supplemented by a study of clinical laboratory procedures, as illustrating the manifestations of these processes on the clinical side. 80 hours laboratory, 50 hours class work. First semester, fifth year.

5. **Public Health**—A course in public health and sanitation, with especial reference to the problems and methods of this work, as applied both to urban and rural conditions. 34 hours class work. Second semester, sixth year.

6. **Special Work and Research**—Work for specially qualified students, either in advanced routine laboratory procedures, or in special problems.

PEDIATRICS

Professor McClanahan (*Chairman*), Assistant Professors Christie, Hamilton and Moore, Doctors Iwerson, Bantin and Rubnitz

1. **Physical Diagnosis**—Growth and development, diseases of circulation. Second semester, fourth year. 17 hours.

2. **Communicable Diseases**—First semester, fifth year. 34 hours.

3. **Infant Feeding—Nutrition—Diseases of Metabolism**—Second semester, fifth year. 34 hours.

4. (a) **Diseases of Nervous System**—First semester, sixth year. 8 hours.

(b) **Tuberculosis**—First semester, sixth year. 8 hours.

5. (a) **Clinic—University Hospital**. First semester, sixth year.

(b) **Clinic—University Hospital**. Second semester, sixth year.

(c) **Section groups Child's Saving Institute**.

(d) **Section groups on Welfare Stations**. 51 hours.

PHYSIOLOGY AND PHARMACOLOGY

Professor Guenther (*Chairman*), Associate Professor Schneider, Assistant Professor Anderson, Doctor Rusche and Assistants.

A study of vital phenomena presented with special reference to their medical bearing. The time allotted to the general course is spent in

class conferences and in laboratory experimentation. In addition to imparting information, stress is laid upon training the students in differentiating physiological facts from inferences; in the acquisition of a careful experimental technic; in the cultivation of a capacity for independent observation and in general, in supplying as far as is possible, an intimate knowledge of physiological and pharmacological processes.

The fundamental pharmacologic facts acquired by the student in the laboratory and further elaborated by lectures and demonstrations serve in establishing a rational basis to guide him in the employment of medicinal substances in the treatment of disease.

1. **General Course in Physiology**—Lectures, conferences, quizzes, Preparation of themes, assigned reading and the preparation of abstracts from current literature. Total 85 hours. First semester, fourth year.

2. **Laboratory Course in Physiology**—Must accompany or be preceded by course 1. Total 200 hours. First semester, fourth year.

3. **Normal Physical Diagnosis (Medicine 1)**—General principles. Topography of head, chest and abdomen. Physical signs in health studied by direct personal examination. Laboratory class divided into sections and drilled in inspection, palpation, percussion and auscultation. Total 45 hours. Second semester, fourth year.

4. **Experimental Pharmacology.**

(a) **Pharmacy.** Practical instruction in the principles of compounding, dispensing and administering medicinal agents. Five weeks, two laboratory periods, three hours each. Second semester, fourth year. Total 30 hours.

(b) **Pharmacodynamics.** Action of drugs on laboratory animals. Bio-assay of drugs. Technique of physiological standardization of digitalis, aconite, cannabis, suprarenal gland, pituitary extracts and ergot. Twelve weeks, two laboratory periods, three hours each. Second semester, fourth year. Total 72 hours.

(c) **Didactic Pharmacology**—Action of drugs studied by means of lectures, demonstrations, and quizzes, constant reference made to results obtained in the laboratory. Students drilled in practical prescription writing. Four hours a week thruout the semester. Second semester, fourth year. Total 68 hours.

6. **Therapeutics**—Continuation of course 5. Therapeutic uses of drugs and their toxic manifestations discussed. Prescription writing. fifth year.

Two hours thruout the semester. Total 34 hours. Second semester.

7. **Elective Courses**—Physiology and Pharmacology of special interest leading to research. Arranged as to content and time by consultation with the chairman of the department. Designed for candidates for advanced degrees, for practitioners and for special students.

SURGERY

Professor Jonas (*Chairman*), Clinical Professors Davis, Summers, Stokes and Kennedy; Assistant Professors Brown, Hull and Rich, Doctors Quigley, Nilsson, Roeder, Thompson and Greenberg

The course in surgery aims to give the students a thoro understanding of the principles of surgical pathology, surgical diagnosis and rational treatment and does not attempt in the undergraduate courses the development of surgical operative technic. Minor surgical technic is taught in the dispensary and clinics, including numerous practical exercises in surgical asepsis, and the student is prepared to perform such operations as would come to the practitioner as emergencies or in the course of general work. For surgical courses leading to general surgery the student is referred to graduate courses which may be arranged by consultation with the chairman of the department.

1a. **Principles of Surgery**—Recitation and quiz course on asepsis and antisepsis, anaesthesia, repair, surgical fevers, suppuration, gangrene, thrombosis, embolism, septicemia, wounds, etc. Two hours quiz. Total 34 hours. First semester, fifth year.

1b. **Principles of Surgery**—Course 1a continued. Tumors and morbid growths, description, differentiation, manifestations, operative methods of treatment. Two hours. Total 34 hours. First semester, fifth year.

2a. **Principles of Surgery**—Systematic presentation of surgical procedures. Total 25 hours. Second semester, fifth year.

2b. **Principles and Practice of Surgery**—Course 2a continued. Total 26 hours. Second semester, fifth year.

3. **Surgical Anatomy**—One hour. Total 17 hours. First semester, fifth year.

4. **Surgical Anatomy**—Course 3 continued. One hour. Total 17 hours. Second semester, fifth year.

5. **Fractures and Dislocations**—A lecture, quiz and demonstration course on fractures and dislocations. X-ray diagnosis with application of bandages and casts. Two hours. Total 34 hours. First semester, sixth year.

REGISTER OF STUDENTS, 1920-1921

In Omaha

Sixth Year

Allerton, Roy Perry.....	Central City
Amick, Carl Gideon.....	Loup City
Anderson, Allen Byford.....	Pawnee City
Arcilla, Pedro J.....	Manila, Philippines
Baer, Howard Byron.....	Lincoln
Beck, Gerald Henderson.....	Omaha
